Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

Discussed consisting essentially of language and what would be required to overcome current rejections. Applicant would need to show additional components interfere with composition as claimed and in some way hamper performance. Or if proposed amendment contains triazine ring not taught in prior art then proposed amendment would overcome rejections. Further seam shift resistance is viewed as an additional property of the composition taught by JP 59-150175 which would be moot when composition is applied to fabrics which are not sewn together such as carpets.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)
